

2010 QUALITY STATEMENT

CAMELSPACE LTD | CAMELSPACE SCAFFOLDS LTD | CAMELSPACE EVENTS LTD

Camelspace promises you technically excellent, innovative, aesthetically pleasing and safe temporary structures from a company you can trust.

Our Quality Policy is to innovate, plan, construct and deliver on time, products and services that meet or exceed client expectations. In order to do this, we have implemented quality systems and processes that are continually being improved to satisfy our clients' changing needs.

background

Camelspace prides itself on being able to supply event structures and scaffolds from a range of standard designs in a cost effective and timely manner as well as being specialists in one-off bespoke designs to suit a unique requirement.

Our resources: human; plant; documented knowledge; and alliances with complimentary specialists, allow us to repeatedly cover off every facet of complex temporary structure supply from concept through to successful completion with quality assured through every step.

quality systems, staff training/qualifications and experience

Camelspace's quality systems have benefited from the input of in-house senior staff with over 65 years of combined industry experience gained prior to the inception of Camelspace and culminating in that of the four years ensuing during which time Camelspace has played a shaping role in the industry within New Zealand.

Consistency of quality is in part maintained by the use of in-house professionally qualified Project Managers, Engineers, Advanced Qualified Scaffolders as well as alliances with external design and engineering consultancies.

With scaffolders key in the safe supply of any temporary structure, Camelspace makes a point of operating with one of the highest ratios of 'tickets' in the industry.

product

Camelspace use exclusively the world's most advanced scaffolding system, Layher (www.layher.com.au). Layher is based in Germany with 100% of all design and manufacturing still in Germany.

Layher are an ISO9001 and ISO9002 registered company with TUV certification to verify – making it synonymous with quality. All Layher material complies with the relevant Australasian standards.

continuous improvement and client satisfaction

Camelspace operates a closed loop quality assurance and feedback process around each and every job. Whereby key performance targets are established at the award stage of a contract and indicators monitored constantly throughout the job lifecycle; with project closing including all important evaluation and lessons-learned phases.

safety

Camelspace's paramount priority is safety, that of its clients, employees and the public and is proud to be able to say its record is impeccable with zero Lost Time Accidents (LTA).

environmental

We at Camelspace recognise the necessity for responsible environmental management and conservation of resources. Pollution prevention, recycling, and reduction of all types of waste and emissions are integral parts of Camelspace's environmental programme.
